

Website manager's report for period ending April 19, 2023

Note: I applied less time than usual this reporting period. Since the March board meeting was on the fifth Wednesday of the month while the April board meeting was on the third Wednesday of the month, and a two-week visit from all my family over the Easter holiday further reduced my applied time.

SUMMARY

- A few routine website maintenance tasks were performed; no major issues.

DETAILS

(1) Website Maintenance and Updates

Updated the Home page pink splash to remove some older items and note the April Bridge delay.

(2) eBridge Distribution

Cover email messages and mailing lists were prepared for the April eBridge. An email was sent to all members reminding them of the upcoming picnic, and noting the April Bridge delay.

(3) Newtek credit for unused Windows hosting

As noted in the previous report, we have an email showing the incorrect credit amount, and another email showing the

correction to be applied. I
continue to escalate my request
for one credit notice showing
the correct total, so far without
success...

Kevin
